

# Flying Inspiration

Fly with the feminine

**The Woman of the XXI Century is the woman of the next generation!**

She is beautifully strong, she acts according to her soul purpose  
and because of that she is irresistibly magnetic  
and engages in empowering relationships with men and women.  
She gives birth every day to her reality,  
she pays attention to her feelings  
and her feelings guide her to create what she wants;  
she does it through relationships that help her to discover more about herself,  
relationships are her tool in the playground of life.  
Her feelings are her strength, they complement her intellect,  
they are a precious source of inner guidance.  
She is clear about her vision and purpose,  
therefore she is a beautiful inspiration!  
How does she do all this?  
She is in contact with her womb,  
she is aware of her cycle,  
she acts following her energetic flow,  
she elegantly flows in the river of life guided by herself, her centre,  
this makes her a magnet, a beacon of inspiration rather than perspiration!  
Do you like the picture?  
Does it sound enticing?  
Does it make you feel good?  
I can smell the scent of this woman,  
life for this woman tastes great!
